Subject: Request for Student Internship Placement

The College of Computing and Informatics at Haramaya University offers six undergraduate and eight postgraduate programs. Our undergraduate programs include Computer Science, Information Science, Information Systems, Information Technology, Software Engineering, and Statistics. At the postgraduate level, we provide PhD and MSc programs in Biostatistics, Artificial Intelligence, Biometry, Computer Science, Econometrics, Data Science, and Information Science.

As part of their academic training, undergraduate students are required to undertake a 45-working-day practical attachment during the summer break after completing their third year of study. This internship is designed to provide hands-on experience in relevant organizations, preferably near their parents' residences for convenience.

We previously reached out to your esteemed organization regarding internship opportunities for our students and sincerely appreciate your positive response. Following your confirmation, we have assigned student **Firaol Mustefa** to your institution for the upcoming summer internship.

We deeply value your partnership in fostering the next generation of professionals and look forward to continued collaboration. Should you require any further details, please do not hesitate to contact us.

Thank you for your support.

Sincerely,

Kashun Takele (PhD)
